

19 *Bromus tectorum* Semi-natural Herbaceous Alliance
Cheatgrass Annual Disturbed Grassland

Alliance:

-*Bromus tectorum* Semi-natural
Herbaceous Alliance

Photo Signature Example

Common species:

Bromus tectorum

Project Specifics:

Frequency = 207 total polygons
70 polygons ZION, 137 polygons Environs
Area = 623 total acres
138 acres ZION, 485 acres Environs
Average Size = 3 acres

Description:

This map class was based on field observations since no plots were taken. It was observed in disturbed areas of ZION at lower elevations and a variety of landforms, but was more common in lowlands, old agriculture fields and overgrazed pastures. This alliance is extensive in Main Canyon, Parunaweep Canyon, and Upper Coalpits. The photo signature for this type usually reflected the substrate since actively growing vegetation was minimal at the time of the photography.
